

CUSTOMER / USER FEEDBACK

Central Manchester University Hospitals 
NHS Foundation Trust

We've been fortunate to be amongst the first to use Ulysses' new audit module, specifically because it has been developed with clinical audit in mind. More sophisticated reporting and the fact that it is a web system has enabled us to strengthen our communication of audit activity across the organisation. The modules configuration has allowed me to create an easily understood format that is specific to the way we manage clinical audit in the Trust.

My colleagues in the department have been keen to tell me how much an improvement using the module has made to their work.
